## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-3, 5-9, 14-18, 21, 22, 25 and 26 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,989,125 B2 in view of Groten et al (U.S. Patent 5,970,583 A). Claims 1-13 of U.S. Patent 6,989,125 B2 recite making a nonwoven web including providing a source of fibers, subjecting the fibers to an electrostatic charge, deflecting the fibers with a mechanical (contacting) deflecting device and collecting the fibers. Claims 1-13 of U.S. Patent 6,989,125 B2 do not explicitly recite deflecting fibers with a non-contact, pneumatic deflecting

device. Groten et al (see the entire document, in particular, col. 4, lines 19-28) teaches a process of, and apparatus for, making a nonwoven web including the equivalence of electrostatic, mechanical and pneumatic deflecting devices and thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use a pneumatic deflecting device in claims 1-13 of U.S. Patent 6,989,125 B2 in view of Groten et al.

***Response to Arguments***

3. Applicant's arguments filed on 18 April 2008 have been fully considered but they are not persuasive.

4. Applicant argues (page 6) that independent claims 1 and 14 require a non-contacting deflecting device that provides jets of air at a downward angle with respect to a horizontal plane (emphasis by applicant) and that substitution of the angled deflector of Boney et al with a pneumatic air jet deflector (of Groten et al) with the same angular orientation does not meet the claimed limitation. Examiner responds that Boney et al claims that the mechanical (contacting) deflecting device is adjustable, and one of ordinary skill in the art could adjust such a device as desired in order to provide a desired angle of deflection, and it would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute a pneumatic deflecting device for a mechanical deflecting device since Groten et al teaches the equivalence of electrostatic, mechanical and pneumatic deflecting devices (see also MPEP §804(B)(1); note also

In re Vogel, 422 F.2d 438, 441-442, 164 USPQ 619, 622 (CCPA 1970)).

### **Conclusion**

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
